

Corporate Social Responsibility

TOUCHING LIVES IN THE COMMUNITY

An integral part of cultivating a winning spirit entails the inculcation of a passion to contribute to society. As a responsible corporate citizen, ST Engineering proactively participates in community activities, devoting time and effort to the less fortunate and promoting arts and education.

For the second successive year, the Safety@Work Creative Awards inspired tertiary students to spread the message of safety in a multimedia art competition. Over 200 entries were received, with increased participation from students of ten out of 13 key tertiary institutions in Singapore. The Group is also a sponsor of the NUS Yong Siew Toh Conservatory of Music.

In 2006, the Group's companies joined hands to launch various charity drives, which included an auction and a cross country run, to raise \$250,000 for the President's Challenge in Singapore. This was the third consecutive year that ST Engineering had supported this worthy cause.

The Group continued to be involved in its adopted homes and charities, through donations, visits and organised activities. These organisations included the Moral Home for the Disabled and the Spastic Children's School.

Advancing the Creation and Transfer of Knowledge

Apart from charity, ST Engineering is committed to education programmes and platforms that spark the exchange of knowledge and ideas. During the year, the Group supported prominent conferences such as the IE Forum 2006, organised by International Enterprise Singapore; the Global Entrepolis @ Singapore, organised by the Economic Development Board; and the Shangri-La Dialogue, a leading event for defence and security diplomacy in Asia Pacific by the International Institute for Strategic Studies.

ST Engineering is a pioneer sponsor of the Securities Investors Association (Singapore) and for the past six years, has supported its seminars and workshops to educate retail investors, enabling them to make informed investment decisions. In addition, the Group is a sponsor of the Temasek Defence Systems Institute – a centre for postgraduate education in defence technology and systems for Singapore and international students; and the Lee Kuan Yew School of Public Policy – an academic study and research centre in the areas of public policy and public management.
