

SWIFT 18 UNMANNED SURFACE VESSEL (USV)

SWIFT 18 Unmanned Surface Vessel (USV)

The 18.0m USV can operate under minimal supervisory command and control; with shore bases monitoring performance and providing high level mission objectives thru the capabilities of carrying different payloads, depending on the mission requirements. Integrated with Autonomous Mast and the mission payload system, the expanded operational flexibility of the Swift 18m USV is designed to achieve mission success swiftly and safely.

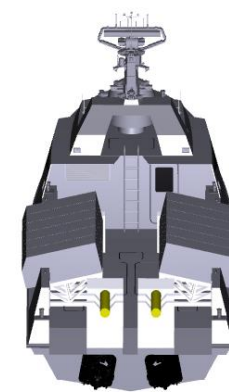

Key Features

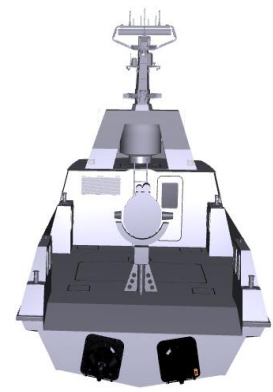

Specifications

Length	18.0m
Breadth	5.3m
Design draft	1.0m
Sea State	Operation up to SS3
Max. Speed	35knots
Design Displacement	35t
Range	Up to 700nm
Endurance	Up to 72hrs
Payload	Up to 5t, 20' container footprint

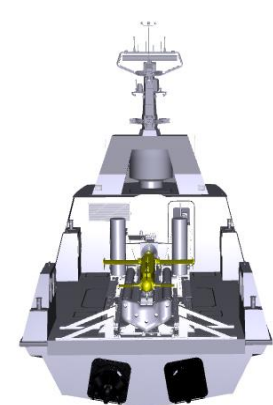

Swift 18 USV - Expendable Mine Disposal System

Swift 18 USV - Constabulary

Swift 18 USV - Firefighting & SAR

Swift 18 USV - Towed Side Array Sonar
