Creating strategies

Disruptive technologies

Breakthrough markets

Building capabilities

Creating synergies

Tap on domain knowledge

Integrate into products and  
solutions

Access customers and  
distribution channels

# SELECTED PORTFOLIO COMPANIES

Beyond funding, our portfolio companies will be able to access the Group's resources, technical and engineering capabilities and customer networks

CloudSphere provides a governance platform to manage the challenges of increasingly complex public cloud deployments with automation and intelligence, dramatically simplifying how enterprises govern access to critical resources, minimize security risks and manage spending in the cloud. Headquartered in Dublin, CloudSphere has offices in Los Altos, London and Tokyo.

Israel-based hiSky is the leader of satellite agile IoT networks, enabling businesses, people, and machines the freedom to connect from any device, anywhere, always. hiSky provides a reliable and affordable satellite IoT terminal and MSS network with an easy-to-use cloud-based management platform that includes monitoring, alerting, and billing capabilities.

Singapore-based Azendian Solutions is a leading provider of information management and advanced analytics implementation, development and consultancy solutions and services. Covering multiple industries and domains, Azendian specialises in anything data. Their expertise is around managing and using data to help their clients achieve or exceed their objectives by bolstering their experience with facts and data.

EdgeQ is a developer of 5G systems designed to offer converged connectivity and AI that is fully software-customizable and programmable. The company's systems offer collaborative robotics automated guided vehicle, autonomous driving, traffic management and digital twin, enabling enterprises to harness private networking for disruptive applications, intelligent services, and new business models.

Skyports designs, builds and operates take-off and landing infrastructure for air taxis, and partners with world-class (eVTOL) passenger and cargo vehicle manufacturers to enable safe, sustainable, and efficient flight operations. Skyports is also a drone services provider, connecting people, businesses, and communities to vital supplies and services, such as healthcare, maritime, logistics, and e-commerce.

Israel-based Radiflow is a leading provider of cybersecurity solutions (intrusion detection and prevention solutions) for critical infrastructure networks (i.e. SCADA), such as power utilities, oil & gas, water and others. SCADA networks often extend across multiple remote sites, allowing automation devices to be controlled from the control centre.

Acquired in Apr 2022
