

# CPW

COMPACT PERSONAL WEAPON

SUPERIOR PERFORMANCE IN LIGHT & COMPACT FORM FACTOR

 **ST Engineering**

The 9mm calibre Compact Personal Weapon (CPW) boasts of features and performance comparable to or even exceeding that of larger and heavier weapons of the same calibre. Able to be holstered and handled like a pistol, the CPW is suitable for law enforcement and security forces.

**Enhanced Safety Features**

Safe use and carriage with incorporated standard safety mode selector, Trigger Drop Safety and Firing Pin Safety Block.

**Low Recoil**

Accurate and controlled firing with its unique cam recoil mitigation mechanism (delayed blowback operation) for significantly reduced recoil.

**Compact Size and Low Weight**

Made of high strength yet lightweight engineering plastic materials and aluminum.

**Retractable Buttstock**

Sturdy built-in retractable buttstock enables the weapon to be used as a pistol with one or two-handed firing posture, or as a sub-machine gun with two-handed firing posture. When retracted, it is compact enough to be holstered without obstructing or causing discomfort to the user.

**Mounting System**

Versatile to use for different operational scenarios with installed top and bottom Picatinny rails conforming to STANAG 4694 standard.

**TECHNICAL SPECIFICATIONS**

<b>General</b>	Calibre	9 mm x 19 mm
	Length	393 mm + 204 mm (Extended)
	Weight	1.7 kg
	Maximum Effective Range	100 m
	Rifling	1 in 10"
	Barrel Length	7.0"
	Muzzle Velocity	360 m/s
	Rate of Fire	900 rpm minimum
	Mode of Fire	Safe, Semi & Auto
	Feeding Type	CPW Magazine
	Operation	Delayed Blowback
<b>Standard Accessories</b>	Cleaning Kit, Sling, 30 Round Plastic Magazine, Speed Loader, Foregrip, Mechanical Sight Module
