ST Engineering Ventures

ST Engineering Ventures (STEV) is the corporate venture capital unit of Singapore Technologies Engineering Ltd (SGX: S63) - a global technology, defence and engineering group specialising in the aerospace, electronics, land systems and marine sectors. With more than 500 smart city projects across 70 cities in its track record, the Group continues to help transform cities through its suite of Smart Mobility, Smart Security and Smart Environment solutions.

Headquartered in Singapore, ST Engineering reported revenue of about US$5.0B in FY2018 and it ranks among the largest companies listed on the Singapore Exchange. It is a component stock of the FTSE Straits Times Index, MSCI Singapore, SGX ESG Transparency Index and SGX ESG Leaders Index.
Technology and innovation underpins what we do as a Group. As industry captains, we continue to solve real-world problems in each of our sectors by leveraging the technology ecosystem and partnerships to stay ahead of the curve.

As the corporate venture capital unit of ST Engineering, we scout for and invest in promising technology start-ups in the following areas:

- **Corporate Venture Capital**: Investing in promising technology start-ups, giving them access to our resources and global networks.
- **Strategic Technology Centres**: Deeping our capabilities in data analytics and cybersecurity.
- **Digital Office**: Synergising and accelerating the Group’s digitalisation efforts.
- **Open Innovation Lab**: Being an innovation exchange for our engineers and supporting entrepreneurs to fast track their innovations.
- **Corporate and Research Labs**: Collaborating with academic and research institutions to accelerate R&D.
Our portfolio companies will be able to access both funding and the Group's resources, technical & engineering capabilities and customer networks.

**Portfolio Companies**

Janus Technologies is a pioneer in BIOS-based security. Its premier solution, the Janus Secure Computing Platform, offers a truly comprehensive enterprise-class solution for today's most security-conscious industries. Founded in 2011 and located in California's Silicon Valley, the company holds more than 20 patents, which allow it to continue to develop and deliver new ways to help organizations guard against both insider and outsider threats.

Singapore-based Azendian Solutions is a leading provider of information management and advanced analytics implementation, development and consultancy solutions and services. Covering multiple industries and domains, Azendian specialize in anything data. Their expertise is around managing and using data to help their clients achieve or exceed their objectives by bolstering their experience with facts and data.

Israel-based Radiflow is a leading provider of cyber security solutions (intrusion detection and prevention solutions) for critical infrastructure networks (i.e. SCADA), such as power utilities, oil & gas, water and others. SCADA networks often extend across multiple remote sites, allowing automation devices to be controlled from the control centre.

Israel-based SafeRide Technologies is the provider of vSentry™ – the industry leading multi-layer cybersecurity solution for connected and autonomous vehicles that combines state-of-the-art deterministic security solution with a ground-breaking AI profiling and anomaly detection technology to provide future proof security.

US start-up, founded in Jun 2017, designing and building next generation marketplace and mapping services to operate on-demand transportation services for mixed fleets.
