

# TACTICAL VEHICLE DRIVING SIMULATOR

Redefine Driving Proficiency

# LEADING-EDGE SIMULATION TRAINING

---

The Tacticle Vehicle Driving Simulator System (TVDS) offers enhanced training for operators of the Higuard Mine-Resistant Ambush Protector (MRAP) vehicle.

Featuring a complete simulation system built on an integrated and scalable architecture, the TVDS can be easily networked to maximise individual and team-based multi-level mission training in a common virtual environment.

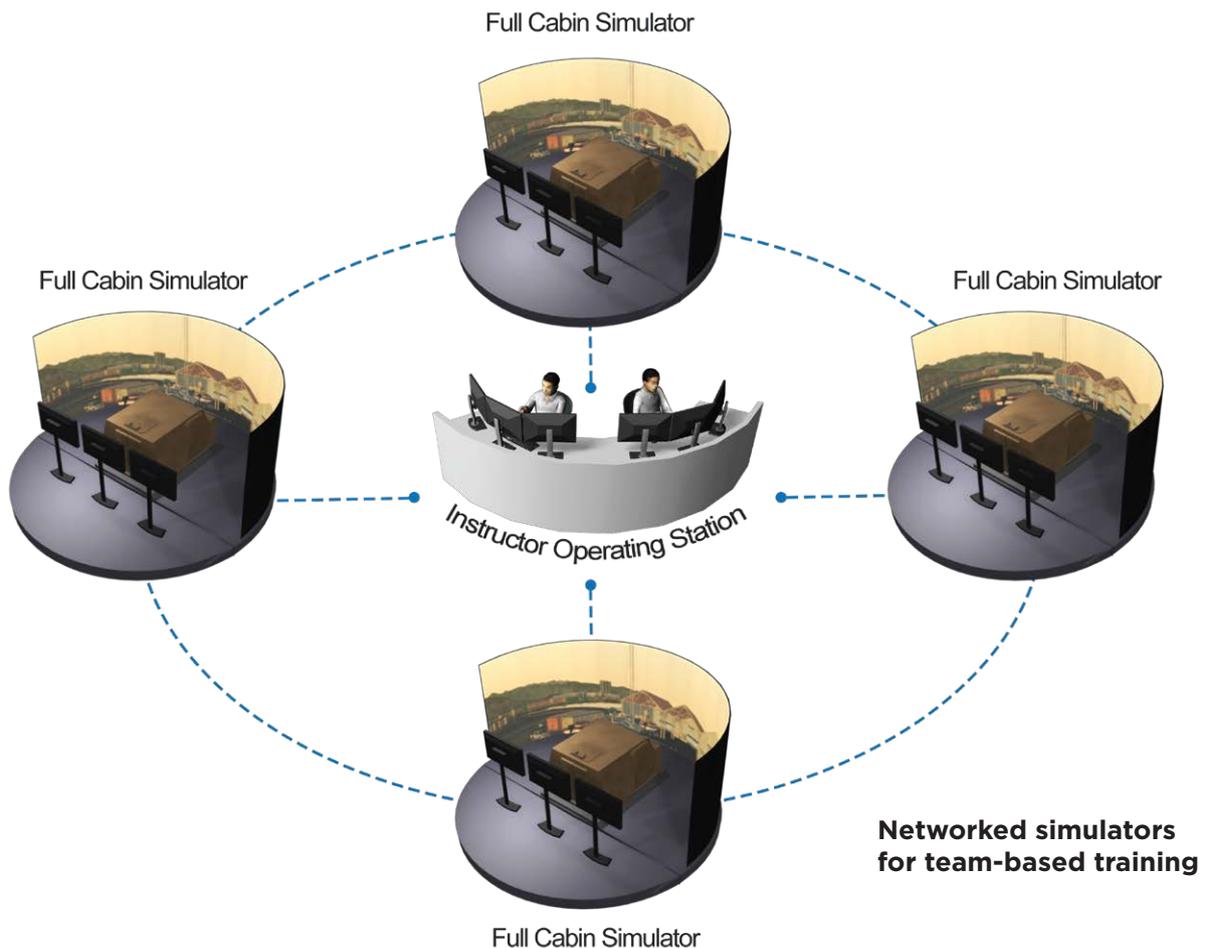

# KEY FEATURES

## Highly Scalable and Flexible Configuration

---

- Multiple cabins can be networked to support large scale team-based training
- Option of motion platforms
- Flexible deployment according to specific requirements

**Motion platform**

## Multi-level Training For Individuals or Teams

---

- Task specific roles for individual training
- Full crew coordinated training for integrated operation scenarios

# Realistic Vehicle Controls and Dynamics

- Training cabins replicate the crew compartment of the Higuard vehicle, with functional controls ranging from switches, gear controls and steering wheel to dashboard display panels
- High fidelity vehicle physics model enhances performance realism

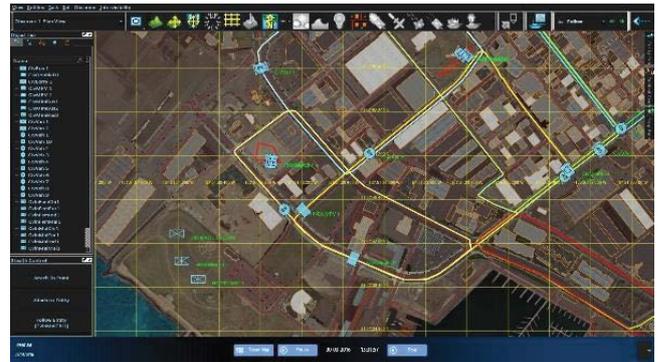

# Instructor Operating Station (IOS)

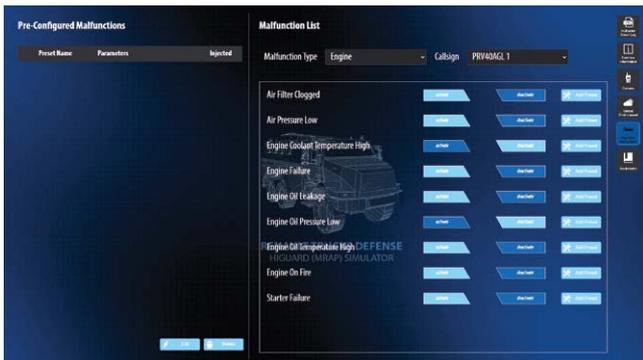

- Allows instructors to create, conduct, monitor and review trainees' performance with ease
- Comprehensive debriefing tool with training analytics
- Detailed trainee assessment reports provide greater insights to training effectiveness

# TRAINING APPLICATIONS

Basic to advanced driving skillsets

Cross-terrain  
Convoy Driving

---

Route  
Familiarisation

---

Customisable Weather  
and Time Of Day

---

## HIGHLIGHTS

- Realistic training cabins enable familiarisation of vehicle controls and dynamics
- Networked capability offers unique, team-based training experience
- Increased training effectiveness through real-time monitoring and performance review on the Instructor Operating Station
